ICE LAW AND CONTRACTS MANAGEMENT (NEC4)

25 WEEK COURSE

COMMENCING 25 SEPTEMBER 2019
AUTUMN AND SPRING TERMS
ICE LAW AND CONTRACTS MANAGEMENT

The Institution of Civil Engineers’ Law and Contracts Management Course is an internationally recognised qualification, possession of which demonstrates an understanding and practical knowledge of construction related law and contract management.

It is suitable for any construction or legal professionals that work with, or are interested in, fast tracking their career by quickly developing the key commercial skills necessary for making the move into management.

THE COURSE WILL provide practical knowledge of the NEC Suite of Contracts and relevant law and is the first step for those hoping to qualify as Arbitrators and Adjudicators.

The ultimate aim of the course is to prepare candidates for the ICE Law and Contracts Management Module 1 and 2 exams which will be held in June 2020.

COURSE DATES AND DETAILS

► This is a 25 week course, held over two terms
► Successful candidates who pass both modules will be awarded the post-nominals “CLCM”
► Lectures for the Autumn term will commence 25 September 2019. The Spring term will commence 22 January 2020
► There will be three revision seminars, focusing on exam preparation and practice held in April/May
► Quigg Golden offers on-going support throughout the duration of the course
► Seminars will be on Wednesdays, starting at 18:00 and finishing at 20:30

COURSE VENUE

Quigg Golden
18–22 Hill Street
Cathedral Quarter
Belfast
BT1 2LA

COURSE FEE

£750.00 plus VAT per delegate

Exam fees are additional and paid directly to the ICE. Individual tutoring is available if required at extra charge.
A handbook and syllabus will be sent to all delegates, including timetables, recommended reading, as well as case law to review before the first seminar.

- Defects within a Contract
- Discharge of a Contract
- Remedies and Damages
- Negligence
- Employer’s Liability
- Nuisance

**SPRING TERM**
Focuses on NEC Contract Management and will cover:

- Tendering Procedure and Documentation
- Main and Secondary Options
- Contract Data, SI and WI - getting them right
- Time and Programming
- Payment and Schedule of Cost Components
- Communications and Notices
- Change Management
- Risk and Early Warnings
- Defects and Remedies
- Disputes and Termination

Quigg Golden has successfully delivered the Law and Contracts Management Course for seven years. Those who undertake this course get a head start on their peers and an insight into the practical and legal administration of construction and NEC Contracts.

Quigg Golden specialises in contract law, procurement, contract disputes and the NEC suite of contracts. Every day we see the problems that arise from failure to properly manage NEC and other standard form contracts.
“The Law and Contracts Management course is perfect for those who either have an interest in contractual issues or require additional support in the proper and informed use of the NEC3 contract. It is a well balanced course that prepared us for module 1 and 2 examinations and gives a good footing for progress en route to becoming an adjudicator/arbitrator. The course content and lecturing standard is excellent and well thought out. The course is also very enjoyable and taught in a relaxed atmosphere. I would certainly recommend this course for Engineers looking to benefit from an extra piece of legal knowledge.”
